- Domestic Energy Performance Certificates
- Non-Domestic Energy Performance Certificates
- SAP Calculations

## CATT Acoustic Modeling

Acoustic Associates have used CATT-Acoustic on a wide variety of projects including *BB93 and Schools Acoustics, Concert Hall Design, Church Acoustics, Shopping Centres, Live Room Design, Recording Studio Design, Lecture Theatres, Drama Studios and Multi-Purpose Spaces.*

CATT-Acoustics enables us to accurately predict the acoustic performance of a space before it is built. This means we can work out the best possible acoustic treatment for your purpose and budget.

If you would like to speak to one of our experienced consultants regarding our acoustic modelling services, please get in touch and we can guide you through the different possibilities.
